

## **IV International Conference UNMAP**

### **Canary Islands**

Goal 16 Promote peaceful and inclusive societies for sustainable development, provide access to justice for all and build effective, accountable and inclusive institutions at all levels.

This conference is directly linked to SDG 16: on the one hand, access to justice is a fundamental right recognized in the Spanish Constitution in Article 24 through the right to effective judicial protection, as well as the right to free legal aid for those who prove insufficient resources to litigate in accordance with Article 119 of the Spanish Constitution;

On the other hand, we must respond to conflicts, insecurity and limited access to justice continues to pose a serious threat to sustainable development.

From the University we have a commitment to human rights, to fundamental rights, to SDG 16.

This includes working on conflict prevention but also on the issue that, when it is difficult to solve disputes, it is important to provide the legal systems with formulas to solve disputes for people, for those subject to justice, for society..
