### 1. Purpose of the project

Educating students about the protection and preservation of health in the school environment.

- Respecting the Anti Covid measures.

### 2. Objectives

- Educating students to keep the distance, hygiene and other measures.
- Educating and aware the students about maintaining their own health and the health of others.

### 3. Project summary

Coronavirus disease (COVID-19), a new disease caused by a new coronavirus, called SARS-COV-2, was first discovered in China in December 2019.

Since then the virus has probably spread around the world where large numbers of people have been infected and there are many victims.

So our school has taken measures to prevent this disease and the start of the new school year.

Students, teachers and parents:

To start a successful year, the school must be a safe place, necessarily following the rules provided in order to maintain health for all.

We hope that this new school year will be auspicious and successful for all! The students of our school with the help of teachers, staff, and parents' advices will respect the ANTI COVID measures.

#### 4. The results

**By respecting the measures we protect our health and the health of others**
