

## Let's make our world more green and clean !

INTRODUCING THE GLOBAL GOALS to little children and teach them the 17 global sustainable development goals for a better tomorrow, for a better life!

Rizario Kindergarten joins its voice with hundreds of thousands of children and takes active action! We teach the 17 global goals of sustainable development to our students for a better tomorrow, for a better life!

We participate with actions for the protection of the environment, for climate change, offering help to our fellow human beings, taking care of our school garden, cultivating empathy and planting trees!

Because a tree can change the climate!

Let's make a better world more green and clean! Because a healthy planet means better quality of life!

[In which world so you like to live? Green or grey? It is up of us!](#)
